MARTIN AUDIO
LONDON

Set up in 2013, The Bug Club have delivered their VW style DJ booth 'Bugs' to hundreds of events from festivals, to brand activations, sporting events to street parties. Major events include Formula 1, The Commonwealth Games, Latitude and Bestival as well as working with brands including VW, BrewDog and Deliveroo.

Since 1971, Martin Audio has been designing and manufacturing leading professional sound systems for clubs, festivals and touring bands. Today, such systems can be found on Glastonbury Pyramid Stage, British Summer Time Hyde Park concerts, Ministry of Sound and on tour with The Killers and Stereophonics.

Belair Technology was founded in 2019 with the goal of electrifying events previously powered by polluting diesel generators. Its founder, John Baillie, grew up with a love of music and a passion for science and he created Belair Technology to help support a green technological revolution at the heart of the live events sector.

A Unique Intersection of Sonic Experience and Environmental Responsibility

**The Bug Club,
Martin Audio and
Belair Technology
have joined forces to
deliver the ultimate
Eco-Friendly
VW 'Pop Up' DJ Booth**

- Belair 'off grid' battery power supply
- Top quality DJs (or DIY)
- Pioneer DJ equipment
- Pro lighting
- Sound technicians
- Branding options with Brand-a-Bug service

UNPLUGGED

Built with sustainability at its heart, the fibreglass Supersized Bug is a trailer, (so no engines) and 30% larger than a standard VW Camper - Huge impact!

The custom built Martin Audio sound system runs entirely on renewables thanks to Belair's rack mounted Power Tower. A rechargeable recycled battery replacement for noisy polluting generators, zero emissions delivering the perfect 'off-grid' solution.

This way you can rest easy knowing you've partied to the max, but also responsibly!

WE THINK GREEN

We love planet Earth and are taking huge steps to make sure we are environmentally friendly

LIGHT WEIGHT & ECONOMICAL

Our fleet of Bugs are trailers, modelled on the classic we all know and love

UNPLUGGED TECHNOLOGY

Powered by custom built, recycled EV rechargeable battery system. Off grid!

PARTY RESPONSIBLY

State of the art custom built Martin Audio sound system powered by renewables
